

AMAR DHILLON

NYC Area | amardhillon844@gmail.com | (XXX) XXX-XXXX | linkedin.com/in/amar-dhillon-917537261 | github.com/AmarDhillon05

Education

University of Maryland, College Park

B.S. in Computer Science, Minor in Statistics; GPA: 3.5

Expected May 2028

College Park, MD

Experience

Amazon Web Services

Sep 2026 – Dec 2026

Software Development Engineer Intern

Redmond, WA

- Writing Java logic that decides how much EC2 capacity Amazon Redshift reserves for operations like patching, setting upper and lower bounds that keep availability high without overspending, and backtesting the policies

Capital One

Jun 2026 – Aug 2026

Software Engineering Intern

Richmond, VA

- Cut AI workflow generation time **65%** to under 15s by splitting one large Claude skill into smaller sub-skills that call Python tools for search and validation, after CloudWatch and OpenSearch latency logs showed where time went
- Because the 270K+ row PostgreSQL workflow table had strict access limits, precomputed popular workflows into a category tree that the Claude skill searches first, with Redis caching full workflows to cut database queries
- Rebuilt the legacy tool developers use to create test-data workflows as a React and TypeScript Electron app with a visual React Flow editor and Jest-tested validation, and **90%** of 30+ surveyed developers preferred it

UMD App Development Contracting (Client: Amazon Leo)

Jan 2026 – Present

Software Engineer (Contract)

College Park, MD

- Cut end-to-end latency **34%** on the pipeline that sends a 6,000+ document scraped research corpus to model inference by replacing scraper-to-S3-to-Lambda staging with Amazon Kinesis streams feeding AWS Lambda
- Deployed a space-topic research tool for Amazon Leo's public-policy team and set it up for handoff with AWS CDK infrastructure-as-code and GitHub Actions CI/CD, so Leo engineers new to the project now maintain it on AWS Fargate
- Automated retraining for a production Amazon Bedrock classifier that rates research documents by importance: on an EventBridge schedule a larger LLM grades its ratings, and fine-tuning runs only when the grades shift past a threshold

UMD Institute for Advanced Computer Studies (UMIACS)

Dec 2025 – Present

Machine Learning Research Intern

College Park, MD

- Cut research-environment setup time **30%** by pinning dependencies with uv and packaging the environment in Docker so every machine gets an identical setup

TerpLabs

Jun 2025 – Present

Co-Founder, Software Engineer

College Park, MD

- Co-founded a 110+ member student product studio that has shipped 5 live products, and personally built Redis caching in front of the Prisma ORM queries for one, Tortuga, a class scheduler with **20,000+ visits** in its first 30 days

Projects

IEX Order Book & Matching Engine | C++17, STL, POSIX, Linux perf

Jul 2026 – Aug 2026

- Built a C++17 order book and matching engine and replayed **50.9M** real IEX exchange messages through it without ever resyncing to the exchange's book, matching 99,122 of 99,123 fills and 100% of top-of-book prices
- Implemented B+ tree and LSM-tree backends for the engine's event log and benchmarked them on identical 2M-record workloads: the B+ tree gave **12.8x** the read throughput and 22x faster range summaries for 27% more disk
- Sustained **1.26M events/sec** end-to-end over the full replay, keeping each price level's orders in a std::list FIFO inside a std::map and a hash map from order ID to list iterator for O(1) cancels

Technical Skills

Languages: Java, Python, C++, TypeScript, JavaScript, SQL, Bash

Cloud & Infrastructure: AWS (EC2, Lambda, Kinesis, Fargate/ECS, API Gateway, EventBridge, SNS), observability (CloudWatch, X-Ray), AWS CDK (infrastructure as code), Docker, GitHub Actions (CI/CD), Linux

Backend, Full-Stack & Data: PostgreSQL, Redis, SQLAlchemy, Prisma, OpenSearch, REST APIs, Node.js, B+ tree and LSM-tree storage

Practices & Tools: debugging and performance profiling (perf, psutil), benchmarking, unit testing (Pytest, Jest), data structures and algorithms, Git, uv

Certification: AWS Certified Developer – Associate (Nov 2024 – Nov 2027)
